Report of Director and School Improvement Council

We believe that there should be a vital link between the career center and business and industry. Communication is the link that must be the strongest if we are to get input from businesses and industry, and in turn provide the type training that is relevant to their needs. The career center must maintain close liaison with the community, the public schools and the students it serves. We further believe that career and technology education should be accessible to all students in the high schools we serve, and that career classes should be representative of the total population. We believe that everyone wants to feel pride in his/her profession, and have a sense of success and self-esteem. Continuous efforts are made to prepare students to be personally responsible for the direction of their lives and careers, and to enter the adult world as responsible, productive citizens.

ESEA/Federal Accountability Rating System

In July 2012, the South Carolina Department of Education was granted a waiver from several accountability requirements of the federal Elementary and Secondary Education Act (ESEA). This waiver allowed SC to replace the former pass/fail system with one that utilizes more of the statewide assessments already in place and combine these subject area results with graduation rate (in high schools) to determine if each school met the target or made progress toward the target. This analysis results in a letter grade for the school rather than the pass/fail system of previous years. For a detailed review of the matrix for each school and districts that determined the letter grade, please use the following link: <http://ed.sc.gov/data/eSEA/> or request this information from your child's district or school.
